Levels of Care

Multiple levels of care allow patients to step up or step down seamlessly between levels of care and locations based on patients' needs.

INPATIENT INTENSIVE TREATMENT UNIT

Adults, ages 18+
Children and teens,
ages 8-17

*Average length of stay is 2-4 weeks**

For patients who have struggled to make progress in a therapeutic community and require structure, containment and an individualized treatment plan.

- Provides intensive medical and psychiatric evaluation and stabilization for patients with complex psychiatric and medical comorbidities in our specialized hospital setting

PATIENT GOALS: Diagnostic, psychopharmacologic, nutritional, behavioral assessment and treatment, resulting in patient transition to IP or Res care level.

INPATIENT

Adults, ages 18+
Children and teens,
ages 8-17

*Average length of stay is 4 weeks**

For patients who have high-acuity medical and/or behavioral conditions and are able to make progress in a milieu setting.

- Manages high-acuity medical and psychiatric issues in our 24-hour specialized hospital setting
- Daily psychiatric and medical contact and 24-hour nursing care

PATIENT GOALS: To achieve medical stabilization and self-regulated management of behavioral safety.

RESIDENTIAL

Adults, ages 18+
Children and teens,
ages 8-17

*Average length of stay is 4-6 weeks**

For patients who would benefit from structured, contained and specialized treatment.

- Full-day programming 12 hours per day, 7 days per week
- Daily medical presence, two psychiatric visits and one dietitian visit minimum per week and 24-hour nursing care in a licensed psychiatric facility

PATIENT GOALS: To learn and apply adaptive, safe, effective and consistent coping skills for daily functioning.

PARTIAL HOSPITALIZATION

Adults, ages 18+
Children and teens,
ages 8-17

*Average length of stay is 4 weeks**

For patients in need of structure, intensive skills practice and who can maintain medication compliance.

- Programming 10 hours M-F, 8 hours Sat. and Sun., 7 days per week
- One psychiatrist, registered nursing and dietitian visit minimum per week and intensive psychotherapeutic structure including individual, group and family therapy

PATIENT GOALS: To apply insights into perpetuating factors that amplify symptoms and develop sustainable skills and strategies for managing symptoms.

INTENSIVE OUTPATIENT (ON-SITE AND VIRTUAL)

Adults, ages 18+
Children and teens,
ages 8-17

*Average length of stay is 8 weeks**

For patients who would benefit from structure and more group support than outpatient therapy provides.

- Outpatient care for 3 hours per day, 3 days per week
- Individual psychotherapy, nutrition therapy and group therapy

PATIENT GOALS: To continue to develop and practice consistent and sustainable skills and strategies for managing symptoms for optimal, independent daily living.

* Denotes average length of stay; treatment length varies by individualized treatment plans.
