Most commercial insurance accepted

Multiple Levels of Care

Enables patients to step up or step down seamlessly between levels of care and locations based on patient's needs.

RESIDENTIAL

Adults, ages 18+
Children and teens, 8-17**

For patients who would benefit from structured, contained and specialized treatment.

- Full-day programming 12 hours per day, 7 days per week
- 24-hour nursing care in a licensed psychiatric facility
- Daily medical presence, two psychiatric visits and one dietitian visit minimum per week
- Expert and innovative psychopharmacologic treatment
- Intensive psychotherapeutic structure including individual, group and family therapy
- Education specialists work as school liaisons, so students can maintain educational objectives
- Average length of stay is 4-6 weeks*

PATIENT GOALS: To learn and apply adaptive, safe, effective and consistent coping skills for daily functioning.

PARTIAL HOSPITALIZATION

Adults, ages 18+
Children and teens, 8-17**

For patients in need of structure, intensive skills practice and who can maintain medication compliance.

- Programming 8 hours M-F, 8 hours Sat. and Sun., 7 days per week
- Three sessions per week with a primary therapist
- Two psychiatric and nutrition sessions per week
- One psychiatrist, registered nursing and dietitian visits minimum per week
- Intensive psychotherapeutic structure including individual, group and family therapy
- Patient spends nights at home or nearby apartments for a comfortable, supportive environment during evening hours
- Education specialists work as school liaisons, so students can maintain educational objectives
- Average length of stay is 4 weeks*

PATIENT GOALS: To apply insights into perpetuating factors that amplify symptoms and develop sustainable skills and strategies for managing symptoms.

INTENSIVE OUTPATIENT (On-site and Virtual – Eating Recovery At Home)

Adults, ages 18+
Children and teens, 12-17**

For patients who would benefit from structure and more group support than outpatient therapy provides.

- Outpatient care for 3 hours per day, 3 days per week
- Individual psychotherapy, nutrition therapy and group therapy
- Patient can stay engaged in school or work while participating in intensive treatment
- Average length of stay is 8 weeks*

PATIENT GOALS: To continue to develop and practice consistent and sustainable skills and strategies for managing symptoms for optimal, independent daily living.

Collaboration With Professional Referents

- Responsive, efficient assessment and admission process
- Care team keeps you updated on patient's progress and collaborates with you to ensure smooth transition back to your care
- Fast-track assessments and admissions available in most cases for patients admitting directly from a hospital setting

**Denotes average length of stay; treatment length varies by individualized treatment plans.*

***Programming for ages 10 and under varies by treatment program and location*
